Dormitory Zone B, VNU-HCM,
Thu Duc City, HCMC

September - 16 - 2004

EDUCATION

Student of Engineering in
Electronics and
Telecommunications

University of Science – VNU-
HCM
(2022–now)

GPA: 7.83

SOFT SKILLS

- Ability to work in groups and alone
- Critical Thinking
- Communication Skills
- Time management
- Eagerness to learn new technologies and tools

LANGUAGE PROFICIENCY

English

- TOEIC: 745
- Basic speaking and writing
- Ability to reading and understanding technical documents

PROFILE

A fourth-year telecommunications student with a strong passion for core technologies, especially 5G. I am actively building solid knowledge in mobile networks, RF fundamentals. I am eager to apply these foundations to real-world 5G network design, optimization, and deployment projects. My long-term goal is to contribute to professional telecom planning, drive-test analysis and develop my knowledge in this field

TECHNICAL SKILLS

Mobile Network Fundamentals

- 4G LTE & 5G NR principles
- OFDM, MIMO, Massive MIMO
- Cell planning, coverage & capacity concepts

Transport & Networking

- OSI model, TCP/IP
- Routing basics
- VLAN, trunking

RF Knowledge

- Path loss, fading, shadowing
- Antenna patterns & beamforming
- Coverage & capacity planning

Simulation & Modeling Tools

- MATLAB / Python (for simulation and data analysis)
- Keysight ADS: RF/microwave circuit simulation, impedance matching, filter design, amplifier performance (gain, stability, noise figure).
- NumPy, Pandas, and Matplotlib for numerical RF modeling (path loss, SINR, fading, MIMO)
